## Skilling Institute to Present Revolutionary Photon-Genius Instrument at Conference July 29

July 27, 2011 04:00 PM Eastern Daylight Time

PHOENIX--(BUSINESS WIRE)--The Skilling Institute, a U.S. [alternative therapy](#) developer, will present the Photon-Genius, a revolutionary instrument used in the field of electro-medicine as an [alternative cancer therapy](#) and [Lyme disease treatment](#), as well as a wide variety of other conditions, at the Extra-Ordinary Technology Conference in Albuquerque, N.M., on July 29 at the Albuquerque Marriott Pyramid North.

When it comes to your health, you don't have to be a genius ... you just have to be one!

Tweet this

The Skilling Institute's Director, Warren Starnes, will be the featured speaker to kick off the national conference's Friday morning session, which focuses on "Extra-Ordinary Technologies." The Photon-Genius was first unveiled at the World Anti-Aging Congress in December 2009.

The Photon-Genius was developed by the Skilling Institute for the purpose of "noticeably" improving the

human body's powers to strengthen, heal and regenerate naturally. The Photon-Genius has been used by medical doctors and health care practitioners as a dynamic alternative cancer therapy and Lyme disease treatment, as well as to improve quality of life issues in a wide variety of other serious conditions.

The Photon-Genius "powers up" the immune system and harmonically balances energy at the cellular level through all the energy meridians of the body. The Photon-Genius's power to naturally balance energy "noticeably" improves the function and condition of every human body.

Ed Skilling, the founder of the Skilling Institute, is recognized worldwide as the leader in the field of electro-medicine. In 1959 he was commissioned by California cancer doctors to apply space-age electronics to the electro-medicine field, which was started in the early 1900s. The first instrument Skilling developed got better results than anything in history, and he has been number one in the world in this growing field of medicine ever since.

Now, thanks to Ed Skilling's genius level research and the continuing innovative electronic developments of the Skilling Institute, "when it comes to your health, you don't have to be a genius ... you just have to use one!"
